

# NATHANIEL “OMAR” MAULDIN

Junior Web Developer - Dallas Relocation US/CAN Citizen

+1 (519) 992 - 4794  omarmauldin@gmail.com  [github.com/omarmauldin](https://github.com/omarmauldin) [linkedin.com/in/omarmauldin](https://linkedin.com/in/omarmauldin)

## ABOUT ME

Junior Web Developer with a technical background in vision systems, automation, and client-facing problem-solving. I have experience debugging systems under pressure, understanding client requirements, and building practical solutions that work in real production environments. I am now focused on web development, using HTML, CSS, JavaScript, Tailwind CSS, and personal projects to keep improving my skills.

## EDUCATION

2023 - 2026

St. Clair College - Windsor

### Advanced Diploma (3-Year) Mobile Applications Development

- Studied full-stack and mobile application development with emphasis on object-oriented programming, databases, UI/UX, and web technologies
- Developed applications using HTML, CSS, JavaScript, Java, Kotlin, and SQL
- Built responsive web and mobile applications through hands-on assignments and team projects.

2019 - 2021

St. Clair College - Windsor

### College Diploma - Electromechanical Engineering Technician - Robotics

- Gained hands-on training in PLCs, robotics, machine vision, sensors, actuators, and automated production systems.
- Developed skills in programming, troubleshooting, robotic systems, mechanical systems, and hydraulic/pneumatic equipment.

## EXPERIENCE

2022 - 2024

Pari Robotics

### Vision Engineer

- Debugged Cognex-based vision systems in real-time automotive environments where downtime impacted output.
- Translated non-technical client requirements into functional vision inspection logic, tools, and pass/fail criteria.
- Created custom vision programs to inspect in production automotive batteries and parts to match quality standards.
- Tested and adjusted inspection programs on the production floor, using results to identify issues and improve detection accuracy quickly.

2021 - 2022

AIS technologies Group

### Vision Specialist

- Debugged Cognex-based vision systems in real-time automotive environments where downtime impacted output.
- Translated non-technical client requirements into functional vision inspection logic, tools, and pass/fail criteria.

## SKILLS

### Frontend:

HTML, CSS, JavaScript, React,  
Tailwind CSS, Responsive Design

### Tools:

Git, GitHub, VS Code, Chrome  
DevTools

### Backend:

PHP, MySQL, REST APIs, Database  
Design

### Programming:

Java, C#, OOP, Debugging
