

NATHANIEL “OMAR” MAULDIN

Full Stack & Mobile Application Developer | Relocating to Dallas, TX | US & Canadian Citizen

+1 (519) 992-4794 | omarmauldin@gmail.com | github.com/omarmauldin | linkedin.com/in/omarmauldin

Professional Summary

Full Stack and Mobile Application Developer with hands-on experience in automation systems, software troubleshooting, and production support environments. Skilled in building responsive web and mobile applications using JavaScript, React, PHP, MySQL, Swift, Kotlin, and REST APIs. Background in robotics and machine vision systems provides strong analytical thinking, debugging expertise, and real-world problem-solving abilities in fast-paced technical environments.

Technical Skills

Frontend	HTML5, CSS, JavaScript, React, Tailwind CSS, Responsive Design
Backend	PHP, MySQL, REST APIs, Database Design
Mobile	Swift(iOS), Kotlin (Android)
Programming	JavaScript, Kotlin, Swift, Java, C#, SQL
Tools	Git, GitHub, VS Code, Chrome DevTools, Unity, Cognex Vision Systems

Professional Experience

Vision Engineer – Pari Robotics | 2022 – 2024

- Engineered automated Cognex vision inspection systems across high-volume automotive production environments.
- Optimized pass/fail inspection logic and detection parameters to improve production accuracy and reduce downtime.
- Directed real-time troubleshooting initiatives for software-driven inspection systems in fast-paced manufacturing environments.
- Translated complex client quality requirements into scalable automated inspection workflows.
- Collaborated cross-functionally with engineering and production teams to deploy automation solutions.

Vision Specialist – AIS Technologies Group | 2021 – 2022

- Developed and deployed machine vision inspection programs for automotive manufacturing systems, contributing to quality-control initiatives across production cells or customer sites.
- Diagnosed software and hardware integration issues through advanced troubleshooting and production-floor analysis.
- Enhanced inspection reliability by refining system configurations and inspection logic, and validating system configurations against quality standards.
- Partnered with engineers, technicians, and clients to deliver production-ready automation solutions, improving stakeholder confidence and reducing post-deployment issues.

Projects

LiftTrack (*In Development*)

React 19 | Tailwind | shadcn/ui | Supabase | React Router | Vite

Full-stack fitness tracker — with custom components

- Designing application architecture using React Router 7 with a persistent sidebar layout and page-level route structure
- Building UI from a custom Figma design using Tailwind CSS 4 and shadcn/ui component library
- Planned features: workout template builder, live session tracking, and progress dashboard with volume and 1RM stats

GitHub: github.com/OmarMauldin/LiftTrack

The Jack Shack (*Deployed*)

HTML | CSS | Vercel

Business landing page — responsive layout, deployed to production

- Built and deployed a responsive multi-section landing page from scratch using semantic HTML and CSS
- Structured layout for readability across mobile and desktop; hosted on Vercel

the-jack-shack.vercel.app · github.com/OmarMauldin/TheJackShack

Artitrack (*College Final Project*)

Swift | Xcode | iOS

Native iOS application built for iOS Development II final

- Developed a native iOS app in Swift applying OOP principles and UIKit/SwiftUI patterns
- Managed debugging and testing cycles to improve stability and user experience

GitHub: github.com/OmarMauldin/Artitrack

Education

Advanced Diploma (3-Year) – Mobile Applications Development

St. Clair College – Windsor | 2023 – 2026

- Developed applications using HTML, CSS, JavaScript, Java, Kotlin, and SQL.
- OOP, cross-platform development, UI/UX design, databases, web and native app development
- Coursework: Angular / JS Frameworks, iOS I & II, Android I & II, PHP & MySQL, Machine Learning & AI for Developers, Game Development, Cloud Server Administration, Capstone Project

College Diploma – Electromechanical Engineering Technician – Robotics

St. Clair College – Windsor | 2019 – 2021

- PLCs, robotics, machine vision, sensors, actuators, and automated production systems
- Diagnosed inspection issues through testing, image analysis, and production-floor troubleshooting
